Internship Electrical/Mechanical Engineering

ABOUT VAVERSA

VaVersa is in a mission to improve the way food is grown and consumed. Started in 2017, we developed a smart indoor garden subscription that allows growing food next to where it is consumed or purchased. The combination of our technology and service gives access to ultra-fresh, high quality produce while reducing the environmental impact of our food. We currently work with professional kitchens mostly and have a lot of exciting projects and opportunities upcoming.

VaVersa is a small but ambitious growing team, composed of a multi-disciplinary international team. Our HQ is in Amsterdam.

ABOUT THE ROLE

We are looking for an electrical engineer intern to support our controller development and electronics operation team. You will be helping out with the research plan and the operation activities in the upcoming months. As we are deploying our gardens in exciting professional kitchens (such as UBER, PESCA and Kromme Dissel), you will be involved in a broad set of activities that range from having a practical project according to the company needs, helping the team with electronics operations and participating in further developments in our controller of our garden. As part of the opportunity, you will be working closely with the founders and will have the opportunity experience first-hand the dynamics of a purpose driven start-up.

RESPONSIBILITIES

- Supporting the development team in the electronics activities. Including developing the new brain of the garden, building and testing the controllers.
- Carrying out a practical/research project.
- Being responsible for the tidiness of your space and the space you work.
- Helping the development team with smaller projects related to electronics.

REQUIREMENTS

- You are studying mechanical or electrical engineering or other electronics studies.
- You want to be part of an ambitious and mission driven team.
- You are excited by new challenges, and you are willing to learn.
- You are not afraid of making decisions and taking responsibility.
- You speak and write fluent English, Dutch is a plus.
- Previous experience in electronics related roles is a plus.

WE OFFER

- The opportunity to work in an exciting industry that allows you to contribute in making a positive impact.
- The ability to work closely with management and have an influence in decision making.
- A nice working environment with international colleagues.
- Free (and fresh) lunch and an unlimited supply of herbs and produce to take home.
- An internship remuneration.

Interested? Feel free to reach out if you feel this could be you!
